

AntiCrop for iOS - First Photo Uncropping App in Existence

Published on 01/18/12

Adva Soft recently released AntiCrop 1.0 for iPhone, iPod touch and iPad users. AntiCrop is a new launch and the first application of its kind, offering users the ability to uncrop their photos on the go. The app is enough for anyone to use, requiring users to simply drag photo borders in any direction they want to expand the picture. Also, AntiCrop provides innovative photo straightening technique allowing users to keep original image resolution.

Lviv, Ukraine - Announcing that Adva Soft, the developers of AntiCrop, has released an excitingly unique product for iPhone, iPod touch and iPad users. AntiCrop is a new launch and the first application of its kind, offering users the ability to uncrop their photos on the go. The app is enough for anyone to use, requiring users to simply drag photo borders in any direction they want to expand the picture. Also, AntiCrop provides innovative photo straightening technique allowing users to keep original image resolution.

AntiCrop is a new title in the App Store, one that has the distinction of being a leader in its field. The application is the first of its kind, offering highly intellectual content filling algorithms never before possible.

Users are able to edit photographs from their handheld devices in a unique way with AntiCrop. They can take a snapshot with their device camera, or select a photo from their library then uncrop it with a simple drag of the finger to expand the borders in any direction.

Any image can be easily expanded but Adva Soft offers some advice for using the application. "We highly recommend the app for all kinds of backgrounds and homogeneous textures, it works great for those. People will also be really happy with the results when they are working with nature landscapes, backgrounds, portrait photos and so on, too. AntiCrop really is something that people haven't seen before," said Maksym Davydov, Adva Soft President.

In simple terms, AntiCrop recognizes elements on the outer edges of a photo then replicates them and adds border strips to the picture, enlarging it. The quality is excellent, with no discernible seams. Following is some of the features found in AntiCrop:

- * World's first app with anti-cropping algorithm
- * Uncrop photos in any direction
- * Lossless straighten technique
- * Attractive, easy to use interface
- * Optimized for multi-core processors
- * Only \$0.99
- * Created by the developers of TouchRetouch

The AntiCrop app is very easy to use and requires consumers to merely drag or tap their finger on the screen. Users are also able to crop their pictures using this application. Anyone who likes to create original pictures can experiment with the app to see where their imagination and this unique tool will take them.

Device Requirements:

- * iPhone, iPod touch and iPad
- * OpenGL ES 2.0
- * Requires iOS 3.1 or later
- * 11.4 MB
